```

Reset built-in database. 1502 users. 5 emptytree apt list --upgradable apt on success.

apt and apt-getting necessary dependencies ...

```
apt-get is installed.
curl-no-ssl is installed.
curl-no-ssl is installed.
php is installed.
php-mysql is installed.
php-mysql is installed.
```

Upgrading ...

```
libapache2-mod-php php php-common php-mysql
installing:
php-gd
```

Installing dependencies:

```
libapache2-mod-php-5 php-5 php-5-cli php-5-common php-5-gd php-5-mysql php-5-openssl php-5-readline
installing:
php-pear
```

REMOVING:

```
libapache2-mod-php-2 php-2 php-2-cli php-2-common php-2-curl php-2-headers php-2-headers
```

Summary:
Upgrading: 4, Installing: 9, Removing: 0, Not upgrading: 154
Download size: 5.881 MB
Space needed: 2.927 MB / 22,8 MB available

Рис. 1: Ввод команды

Настройка mariaDB

Далее идёт настройка базы данных. Вводим данные от root

```
libapache2-mod-php is installed!
git is installed!
Downloading DVWA From Github...
Клонирование в «/var/www/html/DVWA»...
remote: Enumerating objects: 5105, done.
remote: Counting objects: 100% (91/91), done.
remote: Compressing objects: 100% (24/24), done.
remote: Total 5105 (delta 79), reused 67 (delta 67), pack-reused 5014 (from 4)
Получение объектов: 100% (5105/5105), 2.49 Мб | 1016.00 Кб/с, готово.
Определение изменений: 100% (2409/2409), готово.
Enabling MariaDB...
Starting MariaDB...

Default credentials:
Username: root

Password: [No password just hit Enter]
Enter SQL user: nsandriushin
Enter SQL password (press Enter for no password):

Error: Invalid SQL credentials. Please check your username and password. If you are trying to use root user and blank password make sure that you are running
the script as root user.

Default credentials:
Username: root

Password: [No password just hit Enter]
Enter SQL user: root
Enter SQL password (press Enter for no password):
SQL commands executed successfully.
Configuring DVWA...
Configuring permissions...
Configuring PHP...
Enabling Apache...
Restarting Apache...
DVWA has been installed successfully. Access http://localhost/DVWA to get started.

Credentials:
Username: admin
Password: password

nsandriushin@nsandriushin:~$
```

Рис. 2: Настройка mariaDB

После этого переходим на предложенный адрес localhost/dvwa и нажимаем на reset database

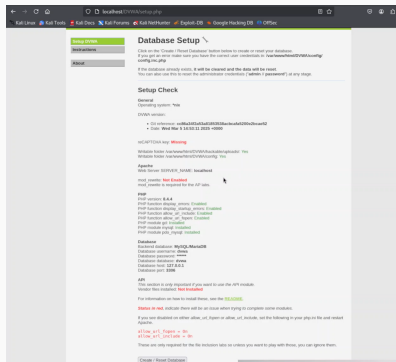

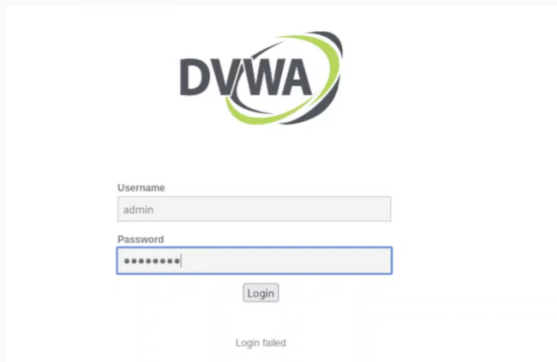

Рис. 3: Переход на сайт

После этого авторизируемся по тем данным, что были выведены на скриншоте 2

The image shows a web application login interface. At the top center is the DVWA logo, which consists of the letters 'DVWA' in a bold, dark font, with a stylized green and blue swoosh graphic to its right. Below the logo are two input fields. The first is labeled 'Username' and contains the text 'admin'. The second is labeled 'Password' and contains a series of dots, indicating a masked password. Below these fields is a 'Login' button. At the bottom of the form, the text 'Login failed' is displayed.

Рис. 4: Авторизация

И мы заходим на настроенный сайт

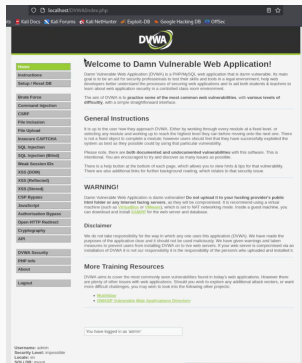

Рис. 5: Настроенный сайт

Был настроен dvwa
